What is a Car Seat Fitting Station?

A car seat fitting station is staffed by a nationally certified Child Passenger Safety Technician. This person has completed a weeklong training course created by the National Highway Traffic Safety Administration. A technician will make an appointment with you to check your child safety seat one-on-one, making sure that the seat is right for your child, fits in the car, and is not damaged or unsafe in any way. Then, the technician can give you advice on how to get a better fit in your car, how to make adjustments in the seat as your child grows, and how to get recalls fixed. They can also recommend the right type of safety seat for your child if your current one is no longer safe.
